

BRAKE PAD XTRA

P 30 094X

The P 30 094X Xtra brake pad is synonymous with reliability

Brembo Xtra brake pads, developed to enhance the advantages of the Xtra and Max discs, are made using the special BRM X L01 compound which consists of more than 30 different components. Compared with the compound used for original-equivalent pads, the new solution assures a higher friction coefficient, which translates to more precise and stable braking, at both high and low temperatures. All this makes for greater driving comfort and improved pedal modularity, without compromising the product's mileage output.
