

# REFRESHED LOOK FOR BREMBO REMANUFACTURED CALIPERS' BOXES!

For years, Brembo has been offering remanufactured calipers in the Aftermarket range, a sustainable solution that involves the recycling of the caliper body and the replacement of parts subject to wear.

From now on, the packaging for Brembo remanufactured calipers for passenger cars is supplied in the new version:

## ■ RENEWED

The box is completely different from the previous one, consisting of two pieces: a container underneath and a cover on four sides.

## ■ SAFER

The box is closed with a special glue, which makes it sealed. This means that it is not possible to open the box without breaking the seal.
